ABOUT ALBA CR

The family-owned company ALBA CR spol. s r.o. was founded in 1992 and has since grown into one of the largest chair manufacturers in the Czech Republic and Slovakia. Our product range includes executive chairs, office chairs, visitor chairs, waiting area benches and design chairs in all price ranges. We focus exclusively on B2B trade and have more than 15 years of experience in exporting to Germany and other EU countries.

SUSTAINABILITY

Making amazing chairs for a sustainable world

ALBA is strictly committed to eliminating the environmental impact of its activities. In 2015, we therefore implemented an environmental management system in accordance with ISO 14001 to reduce negative environmental impacts and improve the efficiency and effectiveness of our operations. We adopt environmentally friendly solutions in all aspects of our operations, from the selection of input materials to packaging and transport, energy consumption or heating of our buildings.

QUALITY AND CERTIFICATION

Full production control guarantees the top quality of our chairs

For us, top quality is not just an empty marketing slogan. It is our trademark that runs throughout ALBA and plays a key role in everything we do. All of our chairs are designed and manufactured with due care in our three modern factories in the Czech Republic, allowing us to guarantee 100% quality control at all stages of production. We prefer components from local and European suppliers that meet all our quality requirements and are properly tested and certified. In 2022, ALBA has been awarded the ecolabel "Environmentally Friendly Product" and the EU Ecolabel to custom made seating furniture.

ALBA PRODUCTION

Our three in-house manufacturing plants allow us to control the quality of every piece of seating furniture we produce. ALBA chairs are made only from proven and tested components, mainly from European suppliers, and upholstery work is a big part of our production.

Handmade to guarantee the highest quality

We are committed to making sure that you sit as comfortably as possible on our chairs. That's why we use the highest quality and certified components to manufacture them, which also guarantees that our chairs will serve you for many years.

We produce moulded foam or cut upholstery fillings, sew fabric covers and assemble chairs by hand directly in our factories. Our products are independently tested and go through a rigorous internal quality control process.

OFFICE CHAIRS

Office seating belongs to the elite disciplines of furniture design

No other piece of furniture requires such a thorough knowledge of anatomy and ergonomics as the office chair. Only through careful study of the human body and sophisticated functional design you can create seating that allows you to work truly efficiently.

GAME

Our biggest chair for professionals looking for top quality and ergonomics at an unbeatable price

We designed the GAME chair especially for professionals who need a perfectly adaptable, ergonomically sophisticated and breathable chair for their modern office. One that provides optimal support, comfort and concentration throughout the day while working at their desk.

Key Features

Extra adjustable

Perfectly adjustable chair with synchronous mechanism in the basic configuration

Components

Components can be easily assembled and replaced

Wide equipment

Wide choice of optional equipment, which can be ordered additionally

High durability

The materials such as injection molded foam (VIP) and high quality mesh or self-supporting fabric guarantee long durability without sagging

The GAME Series

The chairs from the GAME series perfectly adapt to your individual needs and, thanks to their generous design, are also suitable for tall users above 190 cm. The lockable, height-adjustable backrest stays securely in the chosen position and the pleasantly soft lumbar support supports your back exactly where it is needed. A fully adjustable synchronous mechanism is included in the basic configuration and proper seating and better support can be aided by matching armrests and headrests.

KENT

Built for executives and managers, who require maximum comfort in the workplace

The exclusive KENT chairs and armchairs are suitable for corporate reception areas and places where you meet your clients, partners and other important visitors.

Key Features

Extra comfortable backrest

Thanks to its height of 67 cm, the KENT chair provides maximum comfort, making it the ideal office chair for all body types

Ergonomic design

All-day seating comfort is ensured by the use of injected moulded or high-quality foam and rich padding

Synchronous mechanism

This advanced mechanism is part of the basic equipment

High weight capacity

This robust heavy-duty chair has a weight capacity of 160 kg

The KENT Series

The five models in the KENT series share exclusive designs and design details, making them perfect for a complete office environment – from stylish executive offices, to casual workstations and meeting rooms.

LARA

A trusted classic our customers can always rely on

If you are searching for a reliable office chair for busy offices that meets all the essential parameters of ergonomic seating and can easily adapt to the requirements of different users, you have found it in the LARA series.

Key Features Key Features

Extra accessories

The LARA series offers a number of optional accessories such as armrests, bases or headrests

Dynamic seating

Modern synchronous mechanism supports dynamic seating

Maximum comfort

High backrest with adjustable height for maximum comfort

Materials

High quality design, highly durable materials and a certified weight capacity of 130 kg ensure a long service life

The LARA Series

The emphasis on manufacturing quality, long service life and the durability of the materials chosen, together with an enormous variability predestines the LARA series chairs for use in major office buildings. Already the basic models of this series are equipped with a fully adjustable synchronous mechanism, making them suitable for all-day seating. The seats and backrests of the VIP models are made of durable injection molded foam and the luxury mesh version is equipped with a soft, independently adjustable lumbar support as standard.

24/7 SEATING

Chairs that help save lives, protect properties and stay focused

When it comes to safety, compromises must be set aside. That's why at ALBA we manufacture chairs and armchairs for 24-hour operations with the utmost focus on durability, uncompromising ergonomics and the quality of the materials used.

DISPOS

The durable and fantastically comfortable heavyweight champion you can always lean on

DISPOS chairs are the most comfortable seating solution for workers in continuous operations characterised by a very demanding environment. The special ergonomic design with rich padding provides optimal support for intensive use in dispatch centres or call centres.

Key Features

Top quality materials

Made from premium, highly durable components with rich, quality stitched upholstery

Wide setting options

Assistblock knee tilt mechanism with forward rotation axis for superior comfort, lockable in 5 positions, with tilt tension adjustment

Extremely high weight capacity

Extremely robust fully upholstered heavy duty chair with certified weight capacity up to 200 kg

High Durability

Special heavy duty piston for long chair life

The DISPOS Series

The DISPOS series features a special ergonomic design with rich padding and softly padded folding armrests. The chairs offer maximum comfort even under intensive and prolonged use. The two size variants satisfy even very different body types.

DISPOS

DISPOS MIDI

Built For Heavy Duty

A durable construction made of premium components is the basis for a chair that will serve you perfectly for many years. This is the only way the chair can withstand high loads and intensive use by different users. In order for such a chair to be able to handle the widest possible weight spectrum, a sufficiently high load capacity is a key requirement.

KIDS CHAIRS

Make sure their first chair is a great one

Children are not small adults. They have specific demands on the world around them, including seating furniture. Unlike adults, children are still growing, developing and their needs are changing. ALBA children's chairs respond to these needs and have the undeniable advantage that they grow with children thanks to their easy adjustability.

FUXO

This ergonomic growing chair is the best choice for a healthy child's back and a good posture

Thanks to its unique seat and backrest adjustment system, the FUXO children's growing chair is suitable for children from 5 years of age. FUXO is made from premium and tested components and will last children into their teens.

Key Features

Playful patterns

Hand-stitched covers with a rich selection of materials and colours in two playful patterns

Safety

Premium tested components for safety and durability

Growing

Growing chair for healthy sitting from 5 to 16 years

Ergonomic

Perfectly adjustable and ergonomic chair with a weight capacity of 100 kg

The FUXO Series

The depth and height of the backrest can be adjusted independently of each other. Together with the step-free seat height adjustment, the chair can always be easily adapted to the child's current height. For smaller children, FUXO can optionally be equipped with a foot ring to ensure correct foot support even at a standard height desk. Older children will appreciate the fixed or height-adjustable armrests. First-class and tested components together with high-quality, hand-sewn upholstery ensure the chair's long service life.

CONFERENCE SEATING

Provide comfortable seating for all your guests

Conference chairs complement our portfolio of seating furniture. They are most often found in meeting rooms, offices, waiting rooms of various institutions, but also in auditoriums and conference halls. Comfort, durability and functionality are the key features of conference seating.

SQUARE

Unique, edgy design, huge variety of material combinations and great comfort you'll enjoy

The SQUARE range offers a suitable solution for any space. The VIP version of the upholstered chair with elegant stitched edges will provide comfort for your guests in meeting rooms. In waiting areas, you will appreciate the easy hygienic maintenance and durability of plastic or wooden surfaces. For conferences and seminars, the chairs can be equipped with a writing pad or a practical storage basket.

Key Features

Minimalist design

Modern conference chair in a minimalist design

Stitching and upholstery

Precisely hand-sewn covers and high quality upholstery

Equipment

All chairs can be equipped with armrests, writing pads or storage baskets

Stackability

The chairs are stackable up to five pieces for convenient storage or transport

The SQUARE Series

The great variability of SQUARE chairs and benches allows you to choose the colour of the frame and plastic components as well as the material version of the seat and backrest. All chairs share the same quality workmanship and design signature, so they can be used to furnish complete corporate spaces – from office guest seating to meeting and conference rooms to waiting areas.

FILO

A versatile multitalent that presents an elegant solution for any space

The wide selection of variants and accessories allows the FILO chair to fit a wide range of needs – the elegant mesh back and soft upholstery are ideal for representative spaces, the variant with a writing pad works perfect for seminars or conferences, and the all-plastic shell allows easy hygienic maintenance in areas with lots of people.

Key Features

Top quality materials

Subtle conference chair in minimalist design

Comfort

The high-quality polypropylene shell in multiple colours is available with soft upholstery or an breathable mesh backrest

Stackability

The chairs are stackable and can be joined in a row with a row connector

High Durability

Solid steel frame ensures excellent stability

The FILO Series

The chairs of the colourful FILO family stand on a subtle steel frame and surprise with their strength and versatility. They serve as a stylish addition to a table, but they are also perfect for use in auditoriums or conference rooms. The chairs can be connected in rows and are stackable – so they can be quickly stowed away and transported as needed. The chairs are complemented with a matching bench for waiting areas.

LOGOS

A versatile and highly variable range of conference chairs in a distinctive contemporary design for intelligent seating solutions

Logos represents an all-round adaptable range that offers a wide variety of solutions for offices and public spaces. The comfortable, stackable chair with a distinctive italian design is available with a variety of colours and frames. Available in mesh, upholstered and plastic versions, it adapts to the most varied contexts.

Key Features

Great variability

The great variability of the chairs' design allows a choice of two shapes and three colours of the frame

Italian design

Modern and versatile conference chair with a distinctively shaped backrest with stylish, breathable perforations or in a mesh and upholstered design

Stackability

The chairs are stackable by 6 and can be joined in a row

Optional accessories

The 4-legged version can be equipped with castors and an optional plastic table is available for all chair models, making it suitable for training rooms or conferences

The LOGOS Series

The great variability of the chairs' design allows a choice of two shapes and three colours of the frame, four colours of plastics and three types of material for the seat and backrest. The plastic version is available in four colours – black, blue, white and grey, including optional armrests. The mesh and upholstered version comes with black plastic. The 4-legged version can be equipped with castors and an optional plastic table is available for all models, making it suitable for training rooms or conferences.

OLYMP

This timeless and stylish chair will take you the peak of seating comfort

The OLYMP series of meeting chairs provides supremely comfortable seating for conference rooms or for guests in your office. The cantilever frame with integrated armrests stands out for its distinctive look and excellent stability, while improving the ergonomics of the chair by adapting very well to the spine. The comfortably shaped backrest can also be chosen in a airy mesh or high back design. The luxurious look is complemented by the option of a fully upholstered back or wooden armrests.

Key Features

Hand-upholstered

Ergonomically shaped, hand-upholstered conference chairs on a cantilever base or on four legs with integrated armrests

Ergonomical

Even better breathability is provided by the variant with a ergonomically shaped mesh backrest

Stackability

All models are stackable up to three pieces and have a weight capacity of 120 kg

The OLYMP Series

A characteristic design element of the OLYMP series is the distinctively shaped chrome base with integrated armrests in two variants. The separated seat and backrest stand out in comfort and give the chair a pleasant airiness and flexibility.

BERNI

An exceptionally sturdy shell chair in a classic design that excels in high weight capacity

The BERNI range is the perfect choice for demanding environments such as hotels, conference rooms and waiting areas. Thanks to the wide choice of materials, upholstery colours and wood finishes, they perfectly complement the overall design of the interior. The holes in the backrest make manipulation easy and the chairs can be stacked if needed.

LILLY

Timeless wooden chair in a classic design with a wide choice of finishes and upholstery options

Comfortably upholstered versions of the LILLY chair with a chrome plated base are particularly recommended as elegant seating in conference rooms or training facilities. The unupholstered version is an excellent choice for the office kitchen, canteen or waiting room. In addition to LILLY in its natural wooden finish, you'll sure appreciate the choice of several laminate colour options, which are extra scratch-resistant and very easy to maintain.

SOLUTIONS

Comprehensive seating solutions for any type of workplace

We design and manufacture seating furniture for a wide range of situations that share a common purpose: the desire to spend time in a comfortable and inspiring environment.

SCHOOLS AND UNIVERSITIES

We offer comprehensive seating solutions for kindergartens, classrooms, lecture halls, cafeterias, canteens and common areas.

INDUSTRIAL SEATING

Comfort at work is important for everyone. Our portfolio therefore includes not only ergonomic office seating, but also a range of work chairs for special applications. Our chairs meet the demanding requirements of special working environments.

SOFT AND DESIGN SEATING

In our own specialized facility we manufacture soft seating, including atypical customized seating solutions, and we also offer a wide selection of design chairs for reception areas, lobbies, cafés, restaurants, hotels or for outdoor use.

MEDICINE AND NURSING

Special chairs for the healthcare sector are most often used in doctors' offices, waiting and reception areas, staff facilities or nursing homes. They are subject to very similar requirements as office chairs, but they must also meet strict hygiene requirements, especially in terms of sanitary care and maintenance.

Chairs recommended for healthcare facilities:

MEDIC

FABRIC PALETTE

Our upholstery fabrics meet the highest quality standards, so they will look great on your chairs for years to come

Expo

The distinctively textured, highly durable bacteriostatic fabric has a wide range of uses for heavy-duty chairs such as waiting rooms, doctors' offices and rooms in healthcare facilities.

Fortis

The premium, fine plain weave fabric is available in a range of contemporary colours. The water-repellent finish makes it easy to clean upholstered furniture.

The complete offer of colours and surfaces can be found in the price lists or in the ALBA 3D configurator

Eco Leather

The highly durable synthetic fabric with a special anti-static surface treatment resistant to bacteria and bacterial contamination is particularly suitable for healthcare environments. Phthalate-free.

Leather

Premium genuine leather is a highly durable and easy to maintain material that will add a touch of luxury and elegance to any office chair and elevate the overall look of the office.

Silvertex

Superior vinyl-coated fabric with a refined texture of fine woven linen. The surface is protected by Spradling's PERMABLOK® topcoat system, which provides excellent abrasion and stain resistance. With an antimicrobial, antibacterial and antifungal finish, it also meets the requirement for use in medical facilities.

Bombay

The modern fabric with an attractive texture is pleasantly soft thanks to the lining, holds its shape well and does not fray. It is available in many modern shades and thanks to its water-repellent finish and easy cleaning, it is the ideal choice for offices and home offices.

The complete offer of colours and surfaces can be found in the price lists or in the ALBA 3D configurator

Cura

Cura is a soft, multi-purpose upholstery fabric with a voluminous texture a vibrant melange effect and a warm, casual aesthetics. Made from 98% post-consumer recycled polyester.

Bondai

Extremely durable fabric with a wide range of colour variations is a great material for upholstering chairs with a high level of use.

Suedine

The popular suede material is pleasant to the touch and available in many colour options. This makes it an excellent choice for children's chairs, but also for the classic office and visitor chairs.

Wood stain colours

Most of our wooden chairs are available in eight standard natural wood colours. Other wood colours are available upon request, please feel free to contact us.

The complete offer of colours and surfaces can be found in the price lists or in the ALBA 3D configurator

FUNCTIONAL COMPONENTS

Components that ensure functionality and determine the main characteristics of the chair

Supported Dynamic Seating (SDS)

Supports the natural movement of the body and prevents one-sided overload.

Synchronous tilt mechanism

Enables the ergonomic seat and backrest tilt in a synchronised ratio, tilt tension adjustment and further functions to support dynamic sitting.

MECHANISM 1MES27
TB-SYNCHRO

MECHANISM 1MES29
IMA SYNCHRO

MECHANISM 1MES02
T-SYNCHRO

MECHANISM 1MES01
SYNCHRO

Tilt mechanism

Seat and backrest tilt in a constant ratio of 1:1 with adjustable tilt resistance.

MECHANISM 1MEH02
BASIC ARMCHAIR
MECHANISM

ASSISTBLOCK 1MEH01

Asynchronous mechanism

Allows to adjust the seat and the backrest independently to find the optimal static sitting position.

MECHANISM 1MEA01
ASYNCHRO

Permanent contact mechanism

The angle of the backrest can be locked in any position within 20° or left free to move. Also allows to adjust the distance of the backrest from the seat.

PCB
1MEK01
PERMANENT CONTACT
BACK

Infinite stability and endurance

Determine the overall level of stability and durability of the chair for different loads and intensity of use.

Aluminium

Die-cast aluminium bases are the most resistant to high and long term use, they are heavier and provide perfect stability.

LOOP POLISHED
ALUMINIUM BASE
Ø 700 MM

FLAT POLISHED
ALUMINIUM BASE
Ø 640 MM

FLAT BLACK
ALUMINIUM BASE
Ø 640 MM

Nylon

Bases made of polyamide reinforced with 30% glass fibre. They stand out for their excellent strength, dimensional stability, flexibility and mechanical resistance. A metal insert contributes to great durability.

LOOP NYLON CHAIR BASE
WITH METAL INSERT
Ø 640 MM

BASE
1BAS01/1BAS36
FLAT NYLON BASE
Ø 600/640 MM

Steel

The sturdy welded steel base with chrome finish and plastic center cover stands out for its durability at a reasonable price.

BASE 1BAS09
FLAT ALUMINIUM BASE
Ø 640 MM

Perfect freedom of movement

Allow the chair to move freely and bear the weight of the chair. The choice of castors depends on the particular floor type.

Hard castors

The standard plastic castors are designed for soft floors and carpets. A larger diameter reduces rolling resistance so the castors can move easily even on slightly uneven floors.

1KOL01
Ø 50 MM

1KOL05
Ø 65 MM

1KOL10
Ø 60 MM

Soft castors

Rubber castors are designed for hard surfaces such as tiles, floating floors or parquet. The soft rubber on the surface prevents unwanted marks due to abrasion.

1KOL02
Ø 50 MM

1KOL06
Ø 65 MM

1KOL30
Ø 60 MM

Brake castors

They prevent the chair from rolling away spontaneously when sitting down or accidentally leaning against it. When you sit down, the loaded wheels are released.

1KOL03
Ø 50 MM

1KOL07
Ø 65 MM

1KOL04/1KOL08
Ø 50/60 MM

Glides

They are suitable for work chairs and stools with a high piston or frame. For these types of chairs, glides are a safer option as they hold the chair in a fixed position.

1KLU01
BLACK

1KLU13
GRAY

Neck and shoulder relief

Increase seating comfort by distributing the weight of the arms, bringing relief to shoulders and neck.

4D adjustable

Allows you to adjust the height and width. The top of the armrest is adjustable forwards, backwards and can also be rotated inwards or outwards by several degrees. Your forearms are thus comfortably supported in different positions, for example when your wrists are close to each other when typing.

P98

P78
24/7 CHAIRS

P76
24/7 CHAIRS

3D adjustable

The armrests can be adjusted in height and the arm pads can also be adjusted forwards, backwards and sideways. This makes them more adaptable to different body types and chair positions at the desk.

P48C

P48

Height-adjustable

Allow you to adjust the correct height so that your upper arms are freely lowered along the body and the forearms lie horizontally on the armrest. The chrome version offers in addition to better stability the possibility of adjusting the width of the armrest holder.

P44C

P44

P46W
WHITE

P41S
GREY

Fixed

Fixed armrests provide basic support and improve the overall ergonomics of the chair. However, their height may not necessarily suit all body types.

P24

P34S
GREY

Ultimate seating comfort

Increase overall comfort and prevent harmful effects of prolonged sitting.

Lumbar support

For optimal support of the spine in the lumbar region, which is under the most strain when sitting. It can be fixed, height-adjustable, depth-adjustable or inflatable.

INCREASED LUMBAR SUPPORT

HEIGHT-ADJUSTABLE

INFLATABLE DEPTH-ADJUSTABLE

Headrest

A useful helper that supports the head in a comfortable extension of the spine, which significantly helps to relieve the overstressed cervical spine and shoulder area.

INTEGRATED

FIXED

3D ADJUSTABLE

MESH 3D ADJUSTABLE

Extras

Additional features that further enhance overall comfort - a foot ring, decorative seams and firmer foam padding, footstools, clothes hangers and more.
